

# Eleanor Slater Hospital

Eleanor Slater Hospital (ESH) is a public hospital. ESH is operated by the State of Rhode Island's Department of Behavioral Healthcare, Developmental Disabilities, & Hospitals (BHDDH). The hospital treats patients with acute and long-term medical illnesses, as well as patients with mental health conditions.

ESH provides a treatment environment in which dignity, individuality, and respect are emphasized.

In addition to diagnosis and treatment, the hospital focuses on issues of recovery and quality of living. We are dedicated to using a patient, family, and interdisciplinary-centered approach to our care.

Our focus is on recognizing each patient's individuality and their right to dignified and high quality care.

ESH — Regan Unit, Cranston

ESH — Zambarano Unit, Burrillville

## Mission Statement

Eleanor Slater Hospital is a two-campus hospital. The hospital provides long-term acute and post-acute hospital level of care to patients with complex medical and psychiatric needs.

ESH emphasizes collaboration among its leadership, physicians, nurses, and rehabilitative staff reviewing all processes associated with operations and quality care. Processes are continually modified or redesigned resulting in higher quality care for our patient population and improved operations.

Our Mission is derived from the unique medical needs of patients in the community and imperatives:

- To ensure that all patients admitted receive quality diagnostic and clinical management
- To provide all patients with a safe environment
- To recognize, affirm and protect each patient's rights in care decisions

## Mission (cont'd)

- To provide treatment and care with respect and compassion
- To provide and maintain a high quality of daily living
- To involve patients and their families

These efforts are our priorities in the development of a seamless system of care with specifically defined processes developed through our Performance Improvement Program.
