16. What's the difference between assistive technology and technology?

- The definition of assistive technology (AT) is any item, piece of equipment, software program, or product system that is used to increase, maintain, or improve the functional capabilities of persons with disabilities. For a long time, assistive technology focused on specialized tools and devices. Now with touch screen tablets, and smart devices created for the entire population, technology is becoming more accessible for everyone. Many of these new devices meet the definition of AT.
