OMB No. 0930-0222

Expiration Date: 06/30/2023

Public Burden Statement: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this project is 0930-0222. Public reporting burden for this collection of information is estimated to average 18 hours per respondent, per year, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to SAMHSA Reports Clearance Officer, 5600 Fishers Lane, Rockville, MD 20857.

### INTRODUCTION

The Annual Synar Report (ASR) format provides the means for states to comply with the reporting provisions of the Public Health Service Act (42 U.S.C. 300x-26) and the Tobacco Regulation for the Substance Abuse Prevention and Treatment Block Grant (SABG) (45 C.F.R. 96.130 (e)).

### How the Synar report helps the Center for Substance Abuse Prevention

In accordance with the tobacco regulations, states are required to provide detailed information on progress made in enforcing youth and young adult tobacco access laws (FFY 2022 Compliance Progress) and future plans to ensure compliance with the Synar requirements to reduce youth and young adult tobacco access rates (FFY 2023 Intended Use Plan). These data are required by 42 U.S.C. 300x-26 and will be used by the Secretary to evaluate state compliance with the statute. Part of the mission of the Center for Substance Abuse Prevention (CSAP) is to assist states<sup>1</sup> by supporting Synar activities and providing technical assistance helpful in determining the type of enforcement measures and control strategies that are most effective. This information is helpful to CSAP in improving technical assistance resources and expertise on enforcement efforts and tobacco control program support activities, including state Synar program support services, through an enhanced technical assistance program involving conferences and workshops, development of training materials and guidance documents, and onsite technical assistance consultation.

### How the Synar report can help states

The information gathered for the Synar report can help states describe and analyze substate needs for program enhancements. These data can also be used to report to the state legislature and other state and local organizations on progress made to date in enforcing youth and young adult tobacco access laws when aggregated statistical data from state Synar reports can demonstrate to the Secretary the national progress in reducing youth and young adult tobacco access problems. This information will also provide Congress with a better understanding of state progress in implementing Synar, including state difficulties and successes in enforcing retailer compliance

<sup>&</sup>lt;sup>1</sup>The term "state" is used to refer to all the states and territories required to comply with Synar as part of the Substance Abuse Prevention and Treatment Block Grant Program requirements (42 U.S.C. 300x-64 and 45 C.F.R. 96.121).

with youth and young adult tobacco access laws.

### Getting assistance in completing the Synar report

If you have questions about programmatic issues, you may call CSAP's Division of Primary Prevention at (240) 276-2550 and ask for your respective State Project Officer, or contact your State Project Officer directly by telephone or email. If you have questions about fiscal or grants management issues, you may call your Grants Management Specialist in the Office of Financial Resources, Division of Grants Management, at (240) 276-1422.

### Where and when to submit the Synar report

The ASR must be received by SAMHSA no later than December 31, 2022 and must be submitted in the format specified by these instructions. Use of the approved format will avoid delays in the review and approval process. The chief executive officer (or an authorized designee) of the applicant organization must sign page one of the ASR certifying that the state has complied with all reporting requirements.

The state must upload one copy of the ASR using the online WebBGAS (Block Grant Application System). In addition, the following items must be uploaded to WebBGAS:

- FFY 2023 Synar Survey Results: States that use the Synar Survey Estimation System (SSES) must upload one copy of SSES Tables 1–8 (in Excel) to WebBGAS. Please note that, in the FFY 2023 ASR, SSES will generate Tables 6, 7, and 8, which are based on the optional microdata on product type, retail outlet type, and whether identification was requested. If your state does not submit these optional data, Tables 6, 7, and 8 will be blank. Tables 6, 7, and 8 are generated for the convenience of the state, and states are not required to submit completed versions of Tables 6, 7, or 8. States that do not use SSES must upload one copy of ASR Forms 1, 4, and 5, and Forms 2 and 3, if applicable, (in Excel), as well as a database with the raw inspection data to WebBGAS.
- Synar Inspection Form: States must upload one blank copy of the inspection form used to record the result of each Synar inspection.
- Synar Inspection Protocol: States must upload a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections. This document should be different than the Appendix C attached to the Annual Synar Report.
- A scanned copy of the signed Funding Agreements/Certifications

Each state SSA Director has been emailed a login ID and password to log onto the Synar section of the WebBGAS site.

### FFY 2023: FUNDING AGREEMENTS/CERTIFICATIONS

The following form must be signed by the Chief Executive Officer or an authorized designee and submitted with this application. Documentation authorizing a designee must be attached to the application.

#### PUBLIC HEALTH SERVICES ACT AND SYNAR AMENDMENT

42 U.S.C. 300x-26 requires each state to submit an annual report of its progress in meeting the requirements of the Synar Amendment and its implementing regulation (45 C.F.R. 96.130) to the Secretary of the Department of Health and Human Services. By signing below, the chief executive officer (or an authorized designee) of the applicant organization certifies that the state has complied with these reporting requirements and the certifications as set forth below.

#### SYNAR SURVEY SAMPLING METHODOLOGY

The state certifies that the Synar survey sampling methodology on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2023 is up-to-date and approved by the Center for Substance Abuse Prevention.

#### SYNAR SURVEY INSPECTION PROTOCOL

The state certifies that the Synar Survey Inspection Protocol on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2023 is up-to-date and approved by the Center for Substance Abuse Prevention.

**State: Rhode Island** 

Name of Chief Executive Officer or Designee: Richard Charest

Signature of CEO or Designee:  $\leq$ 

Director, Rhode Island Department of Behavioral **Title:** Healthcare Developmental Disabilities and Hospitals

If signed by a designee, a copy of the designation must be attached.

### YOUTH AND YOUNG ADULT ACCESS LAWS, ACTIVITIES, AND ENFORCEMENT

42 U.S.C. 300x-26 requires the states to report information regarding the sale/distribution of tobacco products to individuals under age 21.

1.	and you state lav	ndicate any changes or additions to the state tobacco statute(s) relating to youth ng adult access since the last reporting year. If any changes were made to the v(s) since the last reporting year, please upload a copy of the state law to AS. (see 42 U.S.C. 300x-26).
	a.	Has there been a change in the minimum sale age for tobacco products?
		☐ Yes ⊠ No
		If Yes, current minimum age: 19 20 21
	b.	Have there been any changes in state law that impact the state's protocol for conducting <i>Synar inspections?</i>
		☐ Yes ⊠ No
		If Yes, indicate change. (Check all that apply.)  Changed to require that law enforcement conduct inspections of tobacco outlets  Changed to make it illegal for youth and young adults to possess, purchase or receive tobacco  Changed to require ID to purchase tobacco  Changed definition of tobacco products  Other change(s) (Please describe.)
	c.	Have there been any changes in state law that impact the following?
		Licensing of tobacco vendors Yes No
		Penalties for sales to minors
		categories to youth and young adult access law $\square$ Yes $\boxtimes$ No
2.		e how the Annual Synar Report (see 45 C.F.R. 96.130(e)) was made public he state prior to submission of the ASR. (Check all that apply.)
		Placed on file for public review
		Posted on a state agency Web site (Please provide exact Web address and the date en the FFY 2023 ASR was posted to this Web address.)
		Web address: https://bhddh.ri.gov/substance-useaddiction/block-grant-
		<u>information</u>
		Date published: 11.29.2022

		Notice published in a newspaper or newsletter
		Public hearing
		Announced in a news release, a press conference, or discussed in a media interview
	$\boxtimes$	Distributed for review as part of the SABG application process
		Distributed through the public library system
		Published in an annual register
	su an an rei wi ins	Other ( <i>Please describe</i> .) BHDDH provides all local police departments with the rvey results for all outlets in their cities so they may conduct follow-up enforcement d will also provide survey results for prevention coalitions to share with their cities d towns. In addition, BHDDH will provide coalitions certificates to distribute to all ailers in their region that did not sell tobacco to minors during the survey. BHDDH ll require coalitions partner with their local police departments to conduct follow-up spections at all retailers having survey violations and any other retailers identified to lice departments by members of the community.
3.	Identify	the following agency or agencies (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).
	a.	The state agency(ies) designated by the Governor for oversight of the Synar requirements:
		RI Department of Behavioral Healthcare, Developmental Disabilities & Hospitals
		Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
	b.	The state agency(ies) responsible for conducting random, unannounced Synar inspections:
		RI Department of Behavioral Healthcare, Developmental Disabilities & Hospitals
		Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
	c.	The state agency(ies) responsible for enforcing youth and young adult tobacco access law(s):
		RI Department of Behavioral Healthcare, Developmental Disabilities & Hospitals
	d.	Has this changed since last year's Annual Synar Report?
		☐ Yes ⊠ No
4.	•	the following agencies and describe their relationship with the agency ible for the oversight of the Synar requirements.
	a.	Identify the state agency responsible for tobacco prevention activities (the agency that receives the Centers for Disease Control and Prevention's National Tobacco Control Program funding).  RI Department of Health

b.	Has the responsible agency changed since last year's Annual Synar Report?  Yes No
c.	Describe the coordination and collaboration that occur between the agency responsible for tobacco prevention and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies
	Are the same
	Have a formal written memorandum of agreement
	Have an informal partnership
	Conduct joint planning activities
	Combine resources
	Have other collaborative arrangement(s) ( <i>Please describe</i> .)
	☐ No relationship
d.	Does a state agency contract with the Food and Drug Administration's Center for Tobacco Products (FDA/CTP) to enforce the youth and young adult access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act?
	Yes No (if no, go to Question 5)
e.	If yes, identify the state agency responsible for enforcing the youth and young adult access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act (the agency that is under contract to the Food and Drug Administration's Center for Tobacco Products (FDA/CTP)).
	RI Department of Behavioral Healthcare, Developmental Disabilities & Hospitals
f.	Has the responsible agency changed since last year's Annual Synar Report?  ☐ Yes ☑ No
g.	Describe the coordination and collaboration that occur between the agency contracted with the FDA to enforce federal youth and young adult tobacco access laws and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies:
	Have a formal written memorandum of agreement
	☐ Have an informal partnership
	Conduct joint planning activities
	Combine resources
	Have other collaborative arrangement(s) (Please describe.)
	☐ No relationship

	h.	Does the state use data from the FD survey reporting?  ☐ Yes No	A enforcement in	nspections for	Synar
5.	state's y	nswer the following questions regard routh and young adult access to tobact 15 C.F.R. 96.130(e)).	_		
	a.	Which one of the following describe adult access to tobacco laws carried only.)		-	
		<ul> <li>☑ Enforcement is conducted exclusion</li> <li>☑ Enforcement is conducted exclusion</li> <li>☑ Enforcement is conducted by both</li> </ul>	vely by state agen	cy(ies).	gencies.
	b.	The following items concern penalt and young adult access to tobacco leader to be a superior or federal youth and young adult to number requested. If state law does (not applicable). 	N N	Number of <u>fines assessed</u> Number of <u>permits/licenses suspended</u>	98	-	0 <b>610</b> 0

Citations and warning letters are not routinely issued to retailers who sell to minors as part of the Synar Survey; however, some police departments reported citing retailers for the Survey period. If a police department issues a citation or warning letter, these citations or warning letters are sent subsequent to completion of the Survey in the municipality. BHDDH provides survey results to all departments encouraging them to conduct survey follow up enforcement and continue periodic follow up throughout the year. Rhode Island's plan for increased police

participation in survey follow up enforcement since 2020. BHDDH has resulted in more responses from police departments to engage in follow up inspections with a greater willingness to assess fines for violations. As a part of each police department's MOU with BHDDH, BHDDH requested each department identify an officer liaison to be the primary point of contact for BHDDH regarding tobacco follow up inspections. BHDDH would provide support providing youth inspectors and any protocol information. As a result, more departments are issuing fines post survey in our 2022 follow up data. BHDDH has scheduled a meeting with police representatives to continue follow up inspections. We have seen more consistent retailer compliance with their greater awareness of change in law from 18 to 21 years old minimum age to purchase. Tobacco underage purchasing has been publicized. BHDDH made a concerted effort to include youth purchasers from 17 -20 years old since the FFY2021 Synar Survey to assess retailer compliance understanding our violation rates would almost double because the state minimum age was still 18 years of age. Knowing Rhode Island would not receive a financial penalty to Block Grant funds, the survey data was provided to the public and stake holders to implore them to engage their state representatives to amend the current Rhode Island law to raise the minimum age to 21 to coincide with existing federal law. The change would address health and safety concerns and provide clarity to retailers who were confused by 2 different laws. Rhode Island did amend the law in July 2021. The FFY2023 survey was completed with one entire year for retailers to adjust to the change in law and train their staff. Our results reflected greater compliance with a drop in the RVR of 8%

a.	and young adult access to tobacco laws carried out in your state? (Check one category only.)
	☐ Enforcement is conducted only at those outlets randomly selected for the Synar survey.
	☐ Enforcement is conducted only at a subset of outlets not randomly selected for the Synar survey.
	Enforcement is conducted at a combination of outlets randomly selected for the Synar survey and outlets not randomly selected for the Synar survey.
e.	Did every tobacco outlet in the state receive at least one compliance check that included enforcement of the state youth and young adult tobacco access law(s) in the last year?
	☐ Yes ⊠ No
f.	What additional activities are conducted in your state to support enforcement and compliance with state youth and young adult tobacco access law(s)? (Check all that apply and briefly describe each activity in the text boxes below each
	activity.)

The Rhode Island Prevention Resource Center with supports from BHDDH, is completing an online training for all tobacco retailers using some applications from free FDA resources such as retailer training models, slides and updated laws and regulations. Additionally, the training will include topics and issues frequently encountered by tobacco inspectors and retail outlets.
☐ Incentives for merchants who are in compliance (e.g., nonenforcement compliance checks in which compliant retailers are given positive reinforcement and noncompliant retailers are warned about youth and young adult access laws)
Community education regarding youth and young adult access laws
Community education was conducted by some community prevention coalitions. Education was offered virtual school and community events including health fairs and parent workshops. As a component of BHDDH's SYNAR Survey process, our community coalitions connect with retailers surveyed who comply with law, the coalition provides the retailer with a certificate of compliance and reinforces the need for their continued work as a community partner. For retailers not in compliance, retailers are provided with copies of Rhode Island's Youth Access Tobacco Laws and Educational materials about nicotine and most current concerns about ENDS products. Finally, notifying the retailer compliance inspections will be ongoing. The Rhode Island legislature ratified the amended law changing the minimum age to purchase tobacco to 21 in July 2021.
Additionally, coalitions engaged parents to reinforce the need for compliance in their communities. With the increase in youth access and usage of ENDS and other tobacco products, as evidenced by our significant jump in the retailer violation rate in this year's survey, parents have become more assertive engaging their local police departments to conduct follow up inspections at specific tobacco outlets. BHDDH was contacted to provide youth inspectors to conduct these inspections.
Media use to publicize compliance inspection results
Community prevention coalitions, in collaboration with the municipal police departments, published inspection results in local newspapers. As members of the Tobacco Free Rhode Island (TFRI) network, community coalitions participated in statewide activities such as National Night Out to share community resources and support law enforcement tobacco enforcement efforts distributing hundreds of pamphlets about vaping and nicotine health risks and coalitions advocation for and petitioned the legislature to adopt Tobacco 21 raising the minimum age to purchase tobacco products. Many campaigns were forced to go virtual as the pandemic dramatically limited face to face meetings and limited the number of people who could attend events.
Community mobilization to increase support for retailer compliance with youth and young adult access laws

In FY 2017, the community prevention coalitions created under the Rhode Island Substance Abuse Prevention Act of 1987 (RISAPA "community prevention coalitions") continued to conduct a wide range of tobacco prevention-related initiatives including:

Community coalitions advocated for police participation in the annual Synar survey for ongoing enforcement efforts. Some coalitions recruited youth volunteers who attempted to purchase tobacco products from retail vendors. Community coalitions distributed information regarding youth access restrictions and smoking prevention materials to retail tobacco vendors to increase compliance with the youth access to tobacco law and made public the results of both the annual local Synar Survey results and ongoing enforcement efforts in local media outlets.

In 2020-2021, BHDDH staff emphasized SYNAR follow-up inspections providing youth inspectors and procedural background for police departments. Community coalitions also increased their efforts to engage their local police to conduct more inspections. In 2020 follow up inspections were very limited after March. As the pandemic limited access to some tobacco outlets, Rhode Island did conduct complete Synar surveys in 2020 and 2021. By doing so, BHDDH was able to provide ongoing current inspection data to police departments. Rhode Island were able to conduct approximately 365 follow up inspections in 2021 as police departments are more invested in charging retailers rather just assess warnings at the urging of constituents and BHDDH. In 2022, that number increased to 610.

Community coalitions continued to expand their use of websites, Facebook, Twitter and other social media to raise community awareness about tobacco use and the importance of preventing youth access to tobacco products. BHDDH provided coalitions congratulatory certificates for vendors who complied with the state youth access statute and letters encouraging violators to comply with the statute. BHDDH supplemented that effort providing police departments the list of retail outlets who complied with the law during the survey and those who violated encouraging them to follow up with fines or additional inspections.

As previously reported, several municipalities have received authorization from the state legislature to impose sanctions consistent with the state youth access statute. Fines collected remain within the municipality; and in some instances, are allocated for use by the police department and/or community coalition.

Statewide, community coalitions have advocated successfully for adoption of municipal regulations and ordinances which limit tobacco use, particularly in venues where youth are present. Seven additional community coalitions continued advocating for ordinances prohibiting tobacco use at municipally-owned facilities and municipally-sponsored events, including beaches, parks and recreation areas; and more communities adopted such ordinances.

In addition, most community coalitions implemented campaigns, some virtual, to educate all community members about the risks associated with tobacco use. The campaigns included: , World No Tobacco Day, and the National Night Out. Events also were held in conjunction with community and school-based health fairs.

Tobacco Free Rhode Island (TFRI), a network of people and organizations who work on tobacco control such as the American Lung Association, American heart Association and local treatment providers provided information and resources to assist current tobacco users who wish to quit or offered referrals to state-sponsored cessation programs. Many of these cessation services were offered in collaboration with school student assistance counselors whose positions were funded (80%) through BHDDH and the SAPT Block Grant. The FDA/SYNAR Program Coordinator is now a member of the TFRI Steering Committee.

BHDDH was awarded a contract to administer the FDA Tobacco Compliance Inspection Program in 2011 and began conducting inspections in February of 2012. RI was awarded a second contract on August 25, 2014 through August 24, 2017. This contract required the State to conduct at least one retailer compliance inspection at every retail outlet each year. In July of 2017, the FDA extended that contract to September 30, 2017 to coincide with the federal fiscal year end and awarded a new 3-year contract beginning October 1, 2017. That contract ended September 202 and BHDDH was awarded a new four-year contract with FDA beginning October 1, 2020.

During the 2014 state legislative session, the State's tobacco prevention coalition, Tobacco-Free RI successfully advocated for passage of legislation prohibiting the sale, distribution and possession of electronic nicotine delivery systems (ENDS) products to and by children. The legislation also mandates licensing of retailers selling ENDS products and requires BHDDH to enforce the underage sales ban. The licensing and enforcement provisions went into effect January 1, 2015; however, no funding was allocated to support enforcement of the new provisions to the youth access statute. Through the CDC grant, initial retailer inspections related to the sale of ENDS products to underage youth were conducted in participating communities.

On November 5, 2019, the Governor of Rhode Island set forth an executive order banning flavored ENDS products. The emergency mandate makes it illegal to manufacture, distribute or sell flavored electronic nicotine-delivery products in Rhode Island for the next four months. Retailer response to the ban was strong. Many had retained large product inventories in response to the great product demand across all age groups. Distributors did not allow retailers to return their purchased products which resulted in an uptick in illegal sales of flavored ENDS products. Retailers were not able to display tobacco products, but they did attempt to sell as reported by local police departments who had complaints from communities.

### SYNAR SURVEY METHODS AND RESULTS

The following questions pertain to the survey methodology and results of the Synar survey used by the state to meet the requirements of the Synar Regulation in FFY 2022 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).

6.	Has the sampling methodology changed from the previous year?
	☐ Yes ⊠ No
	The state is required to have an approved up-to-date description of the Synar sampling methodology on file with CSAP. Please submit a copy of your Synar Survey Sampling Methodology (Appendix B). If the sampling methodology changed from the previous reporting year, these changes must be reflected in the methodology submitted.
	a. If yes, describe how and when this change was communicated to SAMHSA
_	
	Please answer the following questions regarding the state's annual random, unannounced inspections of tobacco outlets (see 45 C.F.R. $96.130(d)(2)$ ).
	a. Did the state use the optional Synar Survey Estimation System (SSES) to analyze the Synar survey data?
	∑ Yes       □ No
	If <b>Yes</b> , upload a copy of SSES tables 1–8 (in Excel) to WebBGAS. Then go to Question 8. If <b>No</b> , continue to Question 7b.

#### **SECTION II: FFY 2023 (Intended Use):**

Public Law 42 U.S.C. 300x-26 of the Public Health Service Act and 45 C.F.R. 96.130 (e) (4, 5) require that the states provide information on future plans to ensure compliance with the Synar requirements to reduce youth and young adult tobacco access.

1.	In the upcoming year, does the state anticipate any changes in:										
	Synar sampling methodology	☐ Yes	⊠ No								
	Synar inspection protocol	☐ Yes	⊠ No								

If changes are made in either the Synar sampling methodology or the Synar inspection protocol, the state is required to obtain approval from CSAP prior to implementation of the change and file an updated Synar Survey Sampling Methodology (Appendix B) or an updated Synar Survey Inspection Protocol (Appendix C), as appropriate.

2. Please describe the state's plans to maintain and/or reduce the target rate for Synar inspections to be completed in FFY 2023. Include a brief description of plans for law enforcement efforts to enforce youth and young adult tobacco access laws, activities that support law enforcement efforts to enforce youth and young adult tobacco access laws, and any anticipated changes in youth and young adult tobacco access legislation or regulation in the state.

In FFY 2022, BHDDH conducted the annual Synar survey over a two-month period. On a routine basis, inspections conducted during the Survey are not combined with FDA-sponsored compliance inspections.

Over several previous Survey cycles, BHDDH expanded the menu of tobacco products youth inspectors could request based on youth survey results which supported anecdotal evidence that underage youth were able to purchase non-cigarette tobacco products more easily than they were able to purchase cigarettes. Subsequent youth survey inspections conducted by local police departments, confirmed that underage use of non-cigarette tobacco products is increasing as conventional cigarette use has decreased. Early in 2021 with the ban on flavored tobacco products a year old, the tobacco product market moved back to cigarettes for minors. While RI appears to have had some success in reducing reported retail access to cigarettes as the percentage of high school students reporting in the YRBS that they obtained their cigarettes from a retail source decreased from the national high of 28.7% to 20.5%, this rate remains unacceptably high. However, absent additional funding to conduct compliance inspections, it will be difficult for the state to take specific enforcement actions to further reduce the rate. In addition, ENDS products are included in the Survey which provides concrete data related to purchases of ENDS by youth.

As retailers have had an entire year to familiarize themselves with the change in tobacco laws, Rhode Island retailer violation rates have dropped by 8% from 22%. Additional police enforcement and BHDDH's consistent dialogue with police departments has afforded a higher profile for tobacco underage inspection within police departments and the public at large.

For the FFY 2023 Synar Survey, BHDDH continued to encourage police officers participating in the Survey to instruct the youth surveyors to request non-cigarette tobacco products if the products

were readily available in the outlet and the youth inspector felt comfortable in doing so. BHDDH will continue to support local educational and enforcement efforts targeting underage use and availability of non-cigarette tobacco products. BHDDH, in conjunction with the RI Department of Health, will make resource material available to both the BHDDH-funded community prevention coalitions and to other organizations participating in the Tobacco-Free RI network to support community education efforts. Information and resource documents on non-cigarette tobacco products also will be posted on the State's Prevention Resource Center website. Community education also will be provided through the CDC grant-funded communities. As BHDDH holds the State FDA contract to conduct underage compliance inspections, BHDDH provides extensive access to FDA educational and informational resources to community coalitions, TFRI and community- based organizations.

The City of Providence and six other municipalities have adopted municipal ordinances requiring local registration of retail tobacco vendors. Providence also has banned the sale of flavored noncigarette tobacco products and prohibited the redemption of tobacco coupons and discount promotions in 2016, several additional communities advocated for passage of ordinances which mirror some or all of the ordinances adopted in Providence. Some community efforts were derailed by the COVID pandemic. While no communities were successful during the reporting period, RI expects that municipalities that actively advocated last year, will continue their efforts to enact local ordinances requiring local registration of retail tobacco vendors and restrictions on underage sales of tobacco products. Effective enforcement of these and other related municipal ordinances is expected to reduce youth access to such products significantly. In support of these efforts and in communities which have not yet adopted municipal ordinances, BHDDH also will encourage local municipalities to engage in ongoing enforcement of the State's youth access to tobacco statute. In 2021, Rhode Island conducted more follow up inspections to the survey as a result of sharing survey results with local police departments. The chart in this report reflects the increased police enforcement.

Tobacco Free Rhode Island (TFRI) and its community partners will continue to advocate for increased tobacco cessation and enforcement funding from the legislature with BHDDH and its community coalitions are TFRI partners.

BHDDH will continue to require the contracted community prevention coalitions to address tobacco prevention as a condition for receipt of funding. State funding for the community coalitions was eliminated by the State legislature during a previous legislative session. While some funding has been re-allocated through the SAPT block Grant, funding reductions will continue to limit the coalitions' ability to implement comprehensive tobacco prevention measures. Mindful of funding limitations, BHDDH staff will meet with coalition coordinators to discuss the results of the most recent Synar Survey and will again request that they focus their tobacco prevention efforts on restricting youth access as well as reducing underage use of non-cigarette tobacco products. Coalition coordinators will have access to the resources available from the State's Prevention Resource Center to support these efforts. BHDDH's Synar Coordinator now attends virtual Coalition meetings providing Synar updates and reports on follow up inspection and violation rates. BHDDH is reinforcing with coalition members the need to coordinate with local police to address the 22% violation rate in this year's survey with follow up inspections and sanctions rather than warnings. Additionally, the RI Prevention Resource Center is completing the tobacco retailer

training for rollout in early 2023 It will be available to all retailers and clerks virtually. Community coalitions and state departments will reach out to all retailers to ensure retailers are completed.

BHDDH will continue to work with the RI department of Health and with representatives from the community prevention coalitions to develop vendor education materials. These materials will be disseminated to community coalition coordinators. As funding becomes available, the Department of Health and BHDDH will distribute the materials to all licensed tobacco retailers in the State to improve vendor compliance with the State's youth access to tobacco statute.

BHDDH will continue to work collaboratively with the Department of Health and Tobacco-Free RI to develop and implement tobacco prevention and cessation programs as well as to advocate for policies that serve to reduce youth access and youth tobacco use. BHDDH staff will continue to participate in several workgroups whose focus is expanding the number of cessation services available to populations disproportionately impacted by tobacco as well as increasing the capacity of providers to offer these services.

- 3. Describe any challenges the state faces in complying with the Synar regulation. (Check all that apply and describe each challenge in the text box below it.)
  - Limited resources for law enforcement of youth and young adult access laws

The most significant challenge RI experiences in complying with the Synar Regulations is a lack of funding to support enforcement of the State's youth access to tobacco statute. While Rhode Island's high school past 30-day cigarette smoking rates are among the lowest in the nation at 4.8%, according to the latest Youth Risk Behavior Survey (YRBS), the percentage of current high school-age smokers in RI who report obtaining their cigarettes from commercial sources remains among the highest in the nation at 20.5%. State funding for on-going enforcement of the State's youth access law is entirely dependent upon annual appropriations by the State legislature. The recent addition of legislatively mandated inspections of retail outlets for potential sales of ENDS products to children without funding to support these additional inspections has further challenged the State's ability to conduct effective enforcement of the State's youth access law. The results of the current Survey should raise the profile of tobacco enforcement to law makers and law enforcement officials. BHDDH took the opportunity to include 18 and 19 year-old inspectors in response to the federal minimum age to purchase tobacco being raised to 21. We anticipated there would be a large increase in the violation rate having 18-19 year old inspectors conduct approximately 45% of the inspections to gauge their ability to purchase tobacco products across the board. All inspectors were masks which may have contributed to the rise. It was a unique year but our 16-17 year-old inspectors had a 13.46% buy rate which is at least 2% higher than last year. In FFY 2022, BHDDH integrated 19 and 20 yearold youth inspectors into our cadre of surveyors. As anticipated, our rates continued to be twice as high as our FFY2019 rates and remained over the 20% violation rate acceptable threshold for SAMHSA. Regardless of the law charge and the pandemic, our violation rate went up. In FFY 2023, the retailer violation declined to 14.4% with a concentrated effort by BHDDH and local police to conduct underage tobacco inspections in cities and towns. It is

essential as marijuana has become legalized, that the focus on underage use of tobacco not be minimized or disappear with a great focus on the new drug.

Limited resources for activities to support enforcement and compliance with youth and young adult tobacco access laws

Rhode Island's youth smoking rate continues to be among the lowest in the nation; due, in part, to the State's cigarette tax being among the highest nationally. However, the state tax on cigars continues to be capped at \$.50. This policy has served to make flavored and unflavored blunts and little cigars attractive alternatives to conventional cigarettes, particularly among underage children as evidence by the increase in high school students' reports use of cigar products which, at 8.4%, is 3.6 percentage points higher than the reported cigarette use rates. BHDDH will continue to work in collaboration with the Department of Health and community coalitions to educate the community about the effects of the tobacco product tax disparity and its potential impact on underage cigar, little cigar use rates. The pandemic has shown youth tobacco use is on the rise. Rhode Island's violation rate of 22% supports that data.

State and national surveys continue to show that the use of electronic nicotine delivery systems (ENDS) products by children is increasing rapidly (19.2% per RI 2015 YRBS). During the 2019 legislative session, the state legislature passed legislation prohibiting the sale or distribution of electronic nicotine delivery systems (ENDS) products to children, required BHDDH to coordinate enforcement of the ban, and required ENDS products retailers to obtain a license from the RI Department of Health. However, no funding was appropriated to support these efforts. During FFY 2021, BHDDH will work with the statewide network of community prevention coalitions, and the Tobacco-Free RI network to educate state and community leaders about effective strategies to reduce youth access to ENDS products.

BHDDH's continual correspondence with municipal police departments has increased the number of enforcement inspections pre and post Synar survey. In the past two years departments have identified a police liaison with BHDDH to monitor violations and community complaints in cities and towns. When able, BHDDH has provided training youth inspectors to complete local inspections. These police officers are increasingly active in conducting their own inspections as is evidenced in the chart in this report.

Limitations in the state youth and young adult tobacco access laws

☑ Limited public support for enforcement of youth and young adult tobacco access laws

BHDDH's prevention coalitions have been appraised of the Survey results and a corrective action plan is in the works to actively engage retailers to advise them of all law changes and partner with local police departments to conduct follow up inspections and impose sanctions rather than warnings. This data is to be reported to contract monitors on a regular basis. The newly passed law legalizing marijuana may impact the interest in addressing tobacco underage use. BHDDH will continue to conduct FDA inspections and engage local police departments to continue their work as well as the coalitions

Limitations on completeness/accuracy of list of tobacco outlets
Limited expertise in survey methodology
Laws/regulations limiting the use of minors in tobacco inspections
☐ Difficulties recruiting youth and young adult inspectors
Issues regarding the balance of inspections conducted by youth inspectors age 15 and under
Issues regarding the balance of inspections conducted by one gender of youth and young adult inspectors
Geographic, demographic, and logistical considerations in conducting inspections
Cultural factors (e.g., language barriers, young people purchasing for their elders)
Issues regarding sources of tobacco under tribal jurisdiction
Other challenges ( <i>Please list.</i> )

#### APPENDIX A: FORMS 1–5

### FORM 1 (Required for all states not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)

Complete Form 1 to report sampling frame and sample information and to calculate the unweighted retailer violation rate (RVR) using results from the current year's Synar survey inspections.

**Instructions for Completing Form 1:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2023). Provide the remaining information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

- Column 1: If stratification was used:
  - 1(a) Sequentially number each row.
  - 1(b) Write in the name of each stratum. All strata in the state must be listed.

If no stratification was used:

- 1(a) Leave blank.
- 1(b) Write "state" in the first row (indicates that the whole state is a single stratum).

Note for unstratified samples: For Columns 2–5, wherever the instruction refers to "each stratum," report the specified information for the state as a whole.

- Column 2: 2(a) Report the number of over-the-counter (OTC) outlets in the sampling frame in each stratum.
  - 2(b) Report the number of vending machine (VM) outlets in the sampling frame in each stratum.
  - 2(c) Report the combined total of OTC and VM outlets in the sampling frame in each stratum.
- Column 3: 3(a) Report the estimated number of eligible OTC outlets in the OTC outlet population in each stratum.
  - 3(b) Report the estimated number of eligible VM outlets in the VM outlet population in each stratum.
  - 3(c) Report the combined total estimated number of eligible OTC and VM outlets in the total outlet population in each stratum.

The estimates for Column 3 can be obtained from the Synar survey sample as the weighted sum of eligible outlets by outlet type.

- Column 4: 4(a) Report the number of eligible OTC outlets for which an inspection was completed, for each stratum.
  - 4(b) Report the numbers of eligible VM outlets for which an inspection was completed, for each stratum.
  - 4(c) Report the combined total of eligible OTC and VM outlets for which an inspection was completed, for each stratum.
- Column 5: 5(a) Report the number of OTC outlets found in violation of the law as a result of completed inspections, for each stratum.
  - 5(b) Report the number of VM outlets found in violation of the law as a result of completed inspections, for each stratum.
  - 5(c) Report the combined total of OTC and VM outlets found in violation of the law as a result of completed inspections, for each stratum.

Totals: For each subcolumn (a–c) in Columns 2–5, provide totals for the state as a whole in the last row of the table. These numbers will be the sum of the numbers in each row for the respective column.

FORM 1 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar

### Survey data.)

	Summary of Synar Inspection Results by Stratum												
State: _													
FFY: <u>2023</u>													
(	1)		(2)		(3)			(4)			(5)		
STRATUM		NUMBER OF OUTLETS IN SAMPLING FRAME		IN	ESTIMATED NUMBER OF ELIGIBLE OUTLETS IN POPULATION		NUMBER OF OUTLETS INSPECTED			NO. OF OUTLETS FOUND IN VIOLATION DURING INSPECTIONS			
(a) Row#	(b) Stratum Name	(a) Over- the- Counter (OTC)	(b) Vending Machin es (VM)	(c) Total Outlets (2a+2b)	(a) Over- the- Counter (OTC)	(b) Vending Machin es (VM)	(c) Total Outlets (3a+3b)	(a) Over- the- Counter (OTC)	(b) Vending Machin es (VM)	(c) Total Outlets (4a+4b)	(a) Over- the- Counter (OTC)	(b) Vending Machin es (VM)	(c) Total Outlets (5a+5b)

RECORD COLUMN TOTALS ON LAST LINE (LAST PAGE ONLY IF MULTIPLE PAGES ARE NEEDED).

#### FORM 2 (Optional)

#### Appropriate for stratified simple or systematic random sampling designs.

Complete Form 2 to calculate the weighted RVR. This table (in Excel form) is designed to calculate the weighted RVR for stratified simple or systematic random sampling designs, accounting for ineligible outlets and noncomplete inspections encountered during the annual Synar survey.

**Instructions for Completing Form 2:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2023).

- Column 1: Write in the name of each stratum into which the sample was divided. These should match the strata reported in Column 1(b) of Form 1.
- Column 2: Report the number of outlets in the sampling frame in each stratum. These numbers should match the numbers reported for the respective strata in Column 2(c) of Form 1.
- Column 3: Report the original sample size (the number of outlets originally selected, *including\_*substitutes or replacements) for each stratum.
- Column 4: Report the number of sample outlets in each stratum that were found to be eligible during the inspections. Note that this number must be less than or equal to the number reported in Column 3 for the respective strata.
- Column 5: Report the number of eligible outlets in each stratum for which an inspection was completed. Note that this number must be less than or equal to the number reported in Column 4. These numbers should match the numbers reported in Column 4(c) of Form 1 for the respective strata.
- Column 6: Report the number of eligible outlets inspected in each stratum that were found in violation.

  These numbers should match the numbers reported in Column 5(c) of Form 1 for the stratum.
- Column 7: Form 2 (in Excel form) will automatically calculate the stratum RVR for each stratum in this column. This is calculated by dividing the number of inspected eligible outlets found in violation (Column 6) by the number of inspected eligible outlets (Column 5). The state unweighted RVR will be shown in the Total row of Column 7.
- Column 8: Form 2 (in Excel form) will automatically calculate the estimated number of eligible outlets in the population for each stratum. This calculation is made by multiplying the number of outlets in the sampling frame (Column 2) times the number of eligible outlets (Column 4) divided by the original sample size (Column 3). Note that these numbers will be less than or equal to the numbers in Column 2.
- Column 9: Form 2 (in Excel form) will automatically calculate the relative stratum weight by dividing the estimated number of eligible outlets in the population for each stratum in Column 8 by the Total of the values in Column 8.
- Column 10: Form 2 (in Excel form) will automatically calculate each stratum's contribution to the state weighted RVR by multiplying the stratum RVR (Column 7) by the relative stratum weight (Column 9). The weighted RVR for the state will be shown in the Total row of Column 10.
- Column 11: Form 2 (in Excel form) automatically calculates the standard error of each stratum's RVR (Column 7). The standard error for the state weighted RVR will be shown in the Total row of Column 11.
- TOTAL: For Columns 2–6, Form 2 (in Excel form) provides totals for the state as a whole in the last row of the table. For Columns 7–11, it calculates the respective statistic for the state as a whole.

FORM 2 (Optional) Appropriate for stratified simple or systematic random sampling designs.

			Calculati	on of Wei	ghted Reta	ailer Viola	tion Rate		State:	
							(8)		FFY: 2023	3

N - number of outlets in sampling frame

n - original sample size (number of outlets in the original sample)

n1 - number of sample outlets that were found to be eligible

n2 - number of eligible outlets that were inspected

x - number of inspected outlets that were found in violation

p - stratum retailer violation rate (p=x/n2)

N' - estimated number of eligible outlets in population (N'=N\*n1/n)

w - relative stratum weight (w=N'/Total Column 8)

pw - stratum contribution to the weighted RVR

s.e. - standard error of the stratum RVR

# FORM 3 (Required when a cluster design is used for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data.)

Complete Form 3 to report information about primary sampling units when a cluster design was used for the Synar survey.

**Instructions for Completing Form 3:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2023).

Provide information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

Column 1: Sequentially number each row.

Column 2: If stratification was used: Write in the name of stratum. All strata in the state must be listed.

If no stratification was used: Write "state" in the first row to indicate that the whole state

constitutes a single stratum.

Column 3: Report the number of primary sampling units (PSUs) (i.e., first-stage clusters) created for each

stratum.

Column 4: Report the number of PSUs selected in the original sample for each stratum.

Column 5: Report the number of PSUs in the final sample for each stratum.

TOTALS: For Columns 3–5, provide totals for the state as a whole in the last row of the table.

IUIALS.	For Columns 5–5, provide totals for the	state as a whole h	if the fast fow of th	c table.

Total	Total	

# FORM 5 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data)

Complete Form 5 to show the distribution of outlet inspection results by age and gender of the youth and young adult inspectors.

**Instructions for Completing Form 5:** In the top right-hand corner of the form, provide the state name and reporting federal fiscal year (FFY 2023).

Column 1: Enter the number of attempted buys by youth and young adult inspector age and gender.

Column 2: Enter the number of successful buys by youth and young adult inspector age and gender.

If the inspectors are age eligible but the gender of the inspector is unknown, include those inspections in the "Other" row. Calculate subtotals for males and females in rows marked "Male Subtotal" and "Female Subtotal." Sum subtotals for Male, Female, and Other and record in the bottom row marked "Total." Verify that that the total of attempted buys and successful buys equals the total for Column 4(c) and Column 5(c), respectively, on Form 1. If the totals do not match, please explain any discrepancies.

#### APPENDIXES B & C: FORMS

#### **Instructions**

Appendix B (Sampling Design) and Appendix C (Inspection Protocol) are to reflect the state's CSAP-approved sampling design and inspection protocol. These appendixes, therefore, should generally describe the design and protocol and, with the exception of Question #10 of Appendix B, are not to be modified with year-specific information. Please note that any changes to either appendix must receive CSAP's advance, written approval. To facilitate the state's completion of this section, simply cut and paste the previously approved sampling design (Appendix B) and inspection protocol (Appendix C) and respond to Question #10 of Appendix B to provide the requested information about sample size calculations for the Synar survey conducted in FFY 2022.

#### APPENDIX B: SYNAR SURVEY SAMPLING METHODOLOGY

		State:	Knode Island	
		FFY:	2023	
1.	What type of sampling frame is used?			
	$\boxtimes$ List frame (Go to Question 2.)			
	$\square$ Area frame (Go to Question 3.)			
	☐ List-assisted area frame (Go to Question 2.)			

2. List all sources of the list frame. Indicate the type of source from the list below. Provide a brief description of the frame source. Explain how the lists are updated (method), including how new outlets are identified and added to the frame. In addition, explain how often the lists are updated (cycle). (After completing this question, go to Question 4.)

Use the corresponding number to indicate Type of Source in the table below.

- 1 Statewide commercial business list
   2 Local commercial business list
   4 Statewide retail license/permit list
   5 Statewide liquor license/permit list
- 3 Statewide tobacco license/permit list 6 Other

Name of Frame Source	Type of Source	Description	Updating Method and Cycle
State tobacco retailer	3	RI Division of Taxation maintains a list of all licensed retail tobacco vendors – licenses are renewed annually for a \$25 fee.	The list is required by state law to be updated quarterly by the RI Division of Taxation. Annually, Taxation sends out renewal notices and updates the list based on new licenses and renewals. The list is cleaned by reconstructing previous year's list and survey responses as well as by utilizing the results of FDA inspections.
FDA retailer database	6	The retailer list which supports the FDA Tobacco Compliance Inspection Program in RI.	The FDA retailer list is updated as a result of state license list updates, the results from the Annual Synar Survey, on-going FA inspections; and changes originated by FDA.

3.	If an area frame i	s used, d	escribe how are	a sampling unit	ts are de	fined and formed.	
	a. Is any ar ☐ Yes		ıt in the formati	on of the area f	frame?		

	If <b>Yes</b> , what percentage of the state's population is not covered by the area frame?%
l.	Federal regulation requires that vending machines be inspected as part of the Synar survey. Are vending machines included in the Synar survey?
	⊠ Yes □ No
	If $No$ , please indicate the reason(s) they are not included in the Synar survey. Please check all that apply.
	☐ State law bans vending machines.
	☐ State law bans vending machines from locations accessible to youth and young adults.
	☐ State has a contract with the FDA and is actively enforcing the vending machine requirements of the Family Smoking Prevention and Tobacco Control Act.
	Other (Please describe.)
	If Yes, please indicate how likely it is that vending machines will be sampled.
	☐ Vending machines are sampled separately to ensure vending machines are included in the sample
	Vending machines are sampled together with over the counter outlets, so it is possible that
	no vending machines were sampled, however they are included in the sampling frame and
	have a non-zero probability of selection  Other reasons ( <i>Please describe</i> .)
5.	Which category below best describes the sample design? (Check only one.)
	Census (STOP HERE: Appendix B is complete.)
	Unstratified statewide sample:
	Simple random sample (Go to Question 9.)
	Systematic random sample (Go to Question 6.)
	Single-stage cluster sample (Go to Question 8.)
	☐ Multistage cluster sample (Go to Question 8.)
	Stratified sample:
	Simple random sample (Go to Question 7.)
	Systematic random sample (Go to Question 6.)
	Single-stage cluster sample (Go to Question 7.)
	☐ Multistage cluster sample (Go to Question 7.)
	Other (Please describe and go to Question 9.)
6.	<b>Describe the systematic sampling methods.</b> (After completing Question 6, go to Question 7 if st ratification is used. Otherwise go to Question 9.)

7.	Provide	the	following	o inforr	nation a	about	stratification.
<i>,</i> .	IIIII			_ 1111011		wout	ou aunication.

a. Provide a full description of the strata that are created.

For the current Synar Survey, RI uses a stratified sample in which each of the State's thirty-nine municipalities was designated as a stratum. The assigned stratum number reflects alphabetical sorting of the municipalities. Each of the retail tobacco outlets was assigned to a stratum based on the physical (not mailing) address of the outlet as it appears in the state's retailer database. The target sample size for each stratum based on the proportion of the licenses located in the stratum to the total number of retail outlets statewide. The sampling process was then implemented as follows:

#### Sampling Procedure:

- \* Use the SSES calculator to determine the number of outlets sampled in each stratum.
- \* Copy and paste full list of establishments into State/SE 12.0

Using the results of the SSES calculator that showed the number of sampled outlets per municipality, we then used the RAND function in Excel to randomly select which outlets were to be sampled. To do this, each community was lined up by municipality and assigned a number in chronological order. Then, the RAND function was used to select the number of the outlet. For example, there were six outlets for Burrillville and two needed to be selected for the sample. The RAND function was used to then select two random outlets between 1 and 6. If the same number was selected multiple times, we drew another selection until we had the appropriate number of unique, randomly selected outlets per municipality.

		needed to be selected for the sample. The RAND function was used to then select two random outlets between 1 and 6. If the same number was selected multiple times, we drew another selection until we had the appropriate number of unique, randomly selected outlets per municipality.								
	b.	Is clustering used within the stratified sample?								
		☐ Yes (Go to Question 8.)								
		No (Go to Question 9.)								
8.	Provide	Provide the following information about clustering.								
	a.	<b>Provide a full description of how clusters are formed.</b> (If multistage clusters are use give definitions of clusters at each stage.)								
	<b>b.</b>	Specify the sampling method (simple random, systematic, or probability proportional to size sampling) for each stage of sampling and describe how the method(s) is (are) implemented.								

9.	Provide	the following information about determining the Synar Sample.						
	a.	Was the Synar Survey Estimation System (SSES) used to calculate the sample s  Yes (Respond to part b.)						
		$\square$ <b>No</b> (Respond to part c and Question 10c.)						
	b.	SSES Sample Size Calculator used?						
		<ul> <li>State Level (Respond to Question 10a.)</li> <li>Stratum Level (Respond to Question 10a and 10b.)</li> </ul>						
		Stratum Level (Respond to Question Tod and Tob.)						
	с.	Provide the formulas for determining the effective, target, and original outlet sample sizes.						
10. Provide the following information about sample size calculations for the Synar survey								
conducted in FFY 2022.								
	a.	If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the state level sample size, please provide the following						
		information:						
		Inputs for Effective Sample Size: FY22 RVR: 22.8%						
		Frame Size: 968						
		Input for Target Sample Size:						
		Design Effect: 0.9						
		Inputs for Original Sample Size:						
		Safety Margin: 75% Accuracy (Eligibility) Rate: 97.7%						
		Completion Rate: 99.3%						
	b.	If the state uses the sample size formulas embedded in the SSES Sample Size						
		Calculator to calculate the stratum level sample sizes, please provide the stratum level information:						
		See New Chart on following page.						
		Dee Tiew Chair on Tonowing page.						
	c.	If the state does not use the sample size formulas embedded in the SSES Sample Size						
		Calculator, please provide all inputs required to calculate the effective, target, and original sample sizes as indicated in Question 9.						
		original sample sizes as mulcated in Question 7.						

STRATUM ID	СІТУ	STRATUM SIZE	STRATUM RVR 2008	COST WEIGHT OF INSPECTIONS	STRATUM SAMPLE SIZE (Proportional)	PERCENTAGE

## APPENDIX C: SYNAR SURVEY INSPECTION PROTOCOL SUMMARY

<b>State:</b>	Rhode Island
FFY:	2023

Note: Upload to WebBGAS a copy of the Synar inspection form under the heading "Synar Inspection Form" and a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections under the heading "Synar Inspection Protocol."

1.	How do	es the state Synar survey protocol address the following?
	a.	Consummated buy attempts?
		⊠ Required
		Permitted under specified circumstances (Describe: )
		Not permitted
	b.	Youth and young adult inspectors to carry ID?
		Required
		Permitted under specified circumstances (Describe: )
		Not permitted Not permitted
	c.	Adult inspectors to enter the outlet?
		Required
		Permitted under specified circumstances (Describe: <i>If any underage buyer and</i>
		adult believe any potential risk or familiarity with underage buyer)  Not permitted
	d.	Youth and young adult inspectors to be compensated?
		⊠ Required
		Permitted under specified circumstances (Describe: )
		☐ Not permitted
2.	-	the agency(ies) or entity(ies) that actually conduct the random, unannounced Synar ons of tobacco outlets. (Check all that apply.)
	_	Law enforcement agency(ies)
		State or local government agency(ies) other than law enforcement
		Private contractor(s)
		Other

	List the agency name(s): Barrington, Block Island, Bristol, Burrillville, Central Falls,
	Charlestown, Coventry, Cranston, Cumberland, East Greenwich, East Providence, Foster,
	Glocester, Hopkinton, Jamestown, Johnston, Lincoln, Little Compton, Middletown,
	Narragansett, Newport, North Kingstown, North Providence, North Smithfield,
	Pawtucket, Portsmouth, Providence, Richmond, Scituate, Smithfield, South Kingstown,
	Tiverton, Warren, Warwick, West Greenwich, West Warwick, Westerly, and
	Woonsocket
3.	Are Synar inspections combined with law enforcement efforts (i.e., do law enforcement representatives issue warnings or citations to retailers found in violation of the law at the time of the inspection?)?
	☐ Always ☐ Usually ☐ Sometimes ☐ Rarely ☐ Never
4.	Describe the type of tobacco products that are requested during Synar inspections.
	a. What type of tobacco products are requested during the inspection?
	<ul> <li>☐ Cigarettes</li> <li>☐ Small Cigars</li> <li>☐ Cigarillos</li> <li>☐ Smokeless Tobacco</li> <li>☐ Electronic Cigarettes/Electronic Nicotine Delivery Systems (ENDS)</li> <li>☐ Other: Blunts</li> </ul>
	b. Describe the protocol for identifying what types of products and what brands of products are requested during an inspection.
	Products are determined by reports from police officers regarding the types of products youth

can purchase in their respective communities and from the results of community youth surveys. Police officers participating in the Annual Synar survey are instructed to advise youth inspectors to request these items if the items are sold in the establishment. For loose cigarettes, youth are advised to request this only if they feel comfortable in doing so as some stores have code words for these transactions and not using these terms might expose the youth as participating in the Survey.

### 5a. Describe the methods used to recruit, select, and train adult supervisors.

Adult supervisors are required by state law to be adult law enforcement officers. BHDDH contracts with municipal police departments to conduct inspections as part of the Annual Synar Survey and to engage in on-going enforcement efforts. Any participating police department selects the officers to conduct the survey within their respective municipality or in another municipality pursuant to a mutual aid agreement. All officers supervising the youth participants have been trained by BHDDH, if they are not FDA Commissioned Officers who know the protocols and understand all reporting procedures.

5b. Describe the methods used to recruit, select, and train youth and young adult inspectors.

Recruitment and training of youth inspectors primarily is done BHDDH with assistance from local police departments. Some youth participants also received training from the FDA Youth Coordinator. Inspection protocols are reviewed with the youth inspectors just prior to conducting the inspections.

6.	Are there specific legal or procedural requirements instituted by the state to address the issue
	of youth and young adult inspectors' immunity when conducting inspections?

a.	Legal
	⊠ Yes □ No
	(If <b>Yes</b> , please describe.)

RI General Laws Title 11 Criminal Offenses Chapter 11-9 Children (11-9-13.6)

Underage individuals, acting as agents for the department of behavioral healthcare, developmental disabilities and hospitals and with the written permission of parent or guardian, may purchase, with impunity from prosecution, tobacco products for the purposes of law enforcement or government research involving monitoring compliance with this chapter, provided that the underage individuals are supervised by an adult law enforcement official. Any individual participating in an unannounced compliance check of over the counter or vending machine sales, must state his or her accurate age is asked by the sales representative of the retail establishment being checked.

b.	Procedural
v.	1 I UCCUUI a

<b>Yes</b>	□ No
(If Yes, 1	olease describe.)

# **Synar Tobacco Survey Protocol**

## **Survey Dates:**

Start: Upon receipt of survey materials

End: September 30, 2022

If you are unable to complete the survey by the deadline, please contact Maureen Mulligan at 401-462-3051 or <a href="maureen.mulligan@bhddh.ri.gov">maureen.mulligan@bhddh.ri.gov</a>.

<u>Survey Times:</u> The survey should be conducted during the day or evening when the outlets to be inspected are likely to be open for business.

<u>Survey Sites:</u> Survey those outlets for which you receive a pre-printed survey form. If the outlet is closed, no longer sells tobacco products, or if conditions are unsafe for inspecting, check the appropriate box on the data collection form and include the reason why the purchase attempt was not completed.

<u>Additional Sites:</u> If you will be surveying additional sites either immediately following inspection of assigned sites or as part of ongoing enforcement efforts, please complete all assigned inspections before inspecting additional sites. Included with the survey materials are a current list of all licensed retail tobacco outlets within your municipality and black survey forms which may be copied as required.

<u>Survey Teams:</u> Survey teams preferably should consist of one police officer and two youth surveyors.

#### **Procedures:**

\*Each participating law enforcement official will receive the survey forms for the sites for which she or he is responsible.

Due to federal guidelines regarding the survey process, it is critical that you only survey sites for which you have received a report form; no site substitution is allowed for the survey. Purchase attempts at <u>additional</u> sites are permitted.

- \*Police officers are to drive surveyors to the selected site in an unmarked police vehicle.
- \*Police officers should park cars in a location where the surveyor can enter and exit the car and the establishment safely but not be in direct view of the survey site's employees.
- \*The youth will enter the establishment and attempt to make a purchase if:
  - > There are no police officers who are not part of the survey team present in the establishment.
  - > The youth, upon entering the establishment determines that she or he does not know anyone present.
  - > The situation does not appear to be dangerous.

**Please note:** Surveyors are to leave their ID in the vehicle with the officer.

- \* If asked their age, the surveyor must be truthful (per State law); and if asked for ID, they are to answer that they don't have any with them.
- \* If a purchase attempt is successful, the surveyor is to pay for the product and leave the establishment quickly.
- \* Prior to inspecting **tobacco vending machines**, please explain to the youth surveyor that the machines should have a locking device which must be unlocked by a clerk in order for a purchase to be made. The youth should

make an initial check of the machine to determine if the machine is locked. If the machine is not locked, the youth should attempt to make the purchase without approaching a clerk. If the machine is locked, the youth should ask the clerk to unlock it so that a purchase can be made.

- \* Upon completion of each inspection, the youth surveyor reports the results and the officer completes the survey form prior to moving to the next site. Also, if a purchase is made the tobacco product is to be turned over to the law enforcement official immediately upon return to the vehicle.
- \* Document on the report form the tobacco product the youth surveyor attempted to purchase regardless of the outcome of the purchase attempt.

#### **Products Eligible for Purchase:**

- \* Products eligible for purchase are listed on the bottom of the inspection forms. If an establishment sells hookah exclusively, please contact Maureen Mulligan at 462.3051 prior to conducting an inspection at that site.
- \* If you are aware that underage youth in your community are using tobacco products other than cigarettes such as Snus or cigars/blunts or that a vendor sells loose cigarettes; please have the youth surveyor attempt to purchase such products.
- \* Electronic nicotine delivery system products ("ENDS products") a/k/a electronic or e-cigarettes are included in the State law banning sales to individuals under the age of 21. They are eligible for purchase during the Synar survey. ENDS products may be purchased by minors as part of on-going enforcement of RIGL 11-9-13.

**Please Note:** Rhode Island continues to experience a problem with the sale of unstamped or fraudulently stamped cigarettes. If, during the Annual Synar survey or ongoing enforcement efforts, youth purchase such cigarettes, please follow your department's procedure for handling evidence and contact James Galvin at the RI Division of Taxation (574-8768).

#### **Surveyors:**

BHDDH has a group of trained youth inspectors available to assist with the annual survey and with ongoing enforcement efforts. These youth have been trained in conducting compliance inspections, have been age-rated, and have all parental consent form information on file at the Department. If you will be recruiting the youth surveyors yourself, Maureen Mulligan at BHDDH can assist you with this process. She may be reached at 401-462-3051 or <a href="maureen.mulligan@bhddh.ri.gov">maureen.mulligan@bhddh.ri.gov</a>. Please inform her that you will be conducting Synar compliance inspections.

**Surveyors MUST be between the age of 16 and 20.** Do not use youth who are or who appear to be either older or younger than these ages in conducting the survey and/or compliance checks. The youth surveyor age restriction is a federal mandate in accordance with an administrative ruling made by the federal Labor Relations Board.

If you are not using previously trained youth, please convene an age verification panel prior to conducting the survey, using the **Age Rating Sheet** enclosed in the packet. The Age-Rating Panel should consist of 4-5 adults who estimate the apparent age of the youth surveyor. Federal Synar advisors also suggest taking a photo of the youth surveyor(s) prior to conducting the survey and/or checks. The photo should show the clothes worn by the surveyor during the survey/compliance checks.

Please obtain **parental consent** for all youth surveyors to participate in the survey. A sample consent form is included in the survey packet.

Surveyors should dress as they would normally; avoiding makeup and clothing that would make them appear older than 20 years of age.

According to federal guidelines, there should be approximately 50% female surveyors and 50% male surveyors in order to have a valid survey. Please make every effort to recruit both males and females to conduct the inspections and to have male and female youth inspectors conduct an equal number of inspections.

Police Departments are responsible for paying the youth surveyors. Surveyors must be paid at the rate of \$15 per hour which is the current federal contractor minimum rate.

BHDDH will reimburse the police departments for the cost of the surveyors. Request for reimbursement must be made on the approved invoice form which is included in the survey packet. The invoice should include as separate line items the amount requested for each officer and each surveyor as well as for the cost of any cigarettes purchased during the survey. The invoice form is available electronically by request. Please e-mail your request to: <a href="mailto:maureen.mulligan@bhddh.ri.gov">maureen.mulligan@bhddh.ri.gov</a>

7. Are there specific legal or procedural requirements instituted by the state to address the issue of the safety of youth and young adult inspectors during all aspects of the Synar inspection process?

a.	Legal
	☐ Yes ⊠ No
	(If Yes, please describe.)
b.	Procedural
	⊠ Yes □ No
	(If <b>Yes</b> , please describe.)

## **Synar Tobacco Survey Protocol**

### **Survey Dates:**

Start: Upon receipt of survey materials

**End:** September 30, 2022

If you are unable to complete the survey by the deadline, please contact Maureen Mulligan at 401-462-3051 or maureen.mulligan@bhddh.ri.gov.

<u>Survey Times:</u> The survey should be conducted during the day or evening when the outlets to be inspected are likely to be open for business.

<u>Survey Sites:</u> Survey those outlets for which you receive a pre-printed survey form. If the outlet is closed, no longer sells tobacco products, or if conditions are unsafe for inspecting, check the appropriate box on the data collection form and include the reason why the purchase attempt was not completed.

<u>Additional Sites:</u> If you will be surveying additional sites either immediately following inspection of assigned sites or as part of ongoing enforcement efforts, please complete all assigned inspections before inspecting additional sites. Included with the survey materials are a current list of all licensed retail tobacco outlets within your municipality and black survey forms which may be copied as required.

<u>Survey Teams:</u> Survey teams preferably should consist of one police officer and two youth surveyors.

#### **Procedures:**

\*Each participating law enforcement official will receive the survey forms for the sites for which she or he is responsible.

Due to federal guidelines regarding the survey process, it is critical that you only survey sites for which you have received a report form; no site substitution is allowed for the survey. Purchase attempts at <u>additional</u> sites are permitted.

- \*Police officers are to drive surveyors to the selected site in an unmarked police vehicle.
- \*Police officers should park cars in a location where the surveyor can enter and exit the car and the establishment safely but not be in direct view of the survey site's employees.
- \*The youth will enter the establishment and attempt to make a purchase if:
  - > There are no police officers who are not part of the survey team present in the establishment.
  - > The youth, upon entering the establishment determines that she or

he does not know anyone present.

> The situation does not appear to be dangerous.

**Please note:** Surveyors are to leave their ID in the vehicle with the officer.

- \* If asked their age, the surveyor must be truthful (per State law); and if asked for ID, they are to answer that they don't have any with them.
- \* If a purchase attempt is successful, the surveyor is to pay for the product and leave the establishment quickly.

8.	are to b	re any other legal or procedural requirements the state has regarding how inspections e conducted (e.g., age of youth and young adult inspector, time of inspections, training st occur)?
	a.	Legal
		⊠ Yes □ No
		(If <b>Yes</b> , please describe.)
		RI General Laws Title 11 Criminal Offenses Chapter 11-9 Children (11-9-13.6)
		Underage individuals, acting as agents for the department of behavioral healthcare, developmental disabilities and hospitals and with the written permission of parent or guardian, may purchase, with impunity from prosecution, tobacco products for the purposes of law enforcement or government research involving monitoring compliance with this chapter, provided that the underage individuals are supervised by an adult law enforcement official. Any individual participating in an unannounced compliance check of over the counter or vending machine sales, must state his or her accurate age is asked by the sales representative of the retail establishment being checked.  (ii) In fulfilling the requirement of unannounced statewide compliance checks, the department of mental health, retardation and hospitals shall maintain complete records of the unannounced compliance checks, detailing, at least, the date of the compliance check, the name and address of the retail establishment checked or the mail order company, the results of the compliance check (sale/no sale), whether the sale was made as an over-the-counter sale, a mail order purchase or a tobacco vending machine sale, and if a citation was issued for any violation found. The records shall be subject to public disclosure. Further, the department of mental health, retardation and hospitals shall report to the owner of each retail establishment checked or mail order company, the results of any compliance check (sale/no sale) whether the sale was made as an over-the-counter sale, a mail order purchase or a tobacco vending machine sale, and if a citation was issued for any violation found.
		(5) Seek enforcement, concurrently with other state and local officials, of the penalties as detailed in this chapter.
		(6) Develop and disseminate community health education information and materials relating to this chapter.
	b.	Procedural
		⊠ Yes □ No
		(If <b>Yes</b> , please describe.)

# APPENDIX D: LIST SAMPLING FRAME COVERAGE STUDY

(LIST FRAME ONLY)

		State: Rhode Island
		<b>FFY:</b> 2023
1. (	Calenda	ar year of the coverage study: 2018
_•	cuiciiai	ar your of one coverage soundy. <u>2020</u>
2.	a.	Unweighted percent coverage found:%
	<b>b.</b>	Weighted percent coverage found:% Number of outlets found through canvassing:
	c. d.	Number of outlets matched on the list frame:
3.	a.	Describe how areas were defined. (e.g., census tracts, counties, etc.)
	b.	Were any areas of the state excluded from sampling?
		☐ Yes ☐ No
		If Yes, please explain.
<b>4.</b> ]	Please a	answer the following questions about the selection of canvassing areas.
	a.	Which category below best describes the sample design? (Check only one.)
		Census (Go to Question 6.)
		Unstratified statewide sample:
		Simple random sample ( <i>Respond to Part b.</i> )
		Systematic random sample (Respond to Part b.)
		Single-stage cluster sample ( <i>Respond to Parts b and d.</i> )
		☐ Multistage cluster sample ( <i>Respond to Parts b and d.</i> )
		Stratified sample:
		Simple random sample (Respond to Parts b and c.)
		Systematic random sample ( <i>Respond to Parts b and c.</i> )
		Single-stage cluster sample ( <i>Respond to Parts b, c, and d.</i> )
		Multistage cluster sample (Respond to Parts b, c, and d.)
		Other (Please describe and respond to Part b.)

	b.	Describe the sampling methods.
	c.	Provide a full description of the strata that were created.
	d.	Provide a full description of how clusters were formed.
_		
5.		orders of the selected areas clearly identified at the time of canvassing? $\square$ No
6.	Were al	l sampled areas visited by canvassing teams?
	☐ Yes	(Go to Question 7.) $\square$ <b>No</b> (Respond to Parts a and b.)
	a.	Was the subset of areas randomly chosen?
		☐ Yes ☐ No
	<b>b.</b>	Describe how the subsample of visited areas was drawn. Include the number of areas sampled and the number of areas canvassed.
7.	Were fie	eld observers provided with a detailed map of the canvassing areas?
	☐ Yes	□ No
	If No, de	escribe the canvassing instructions given to the field observers.
8.	Were fie	eld observers instructed to find all outlets in the assigned area?
	☐ Yes	□ No
	If Yes, de	spond to Question 9. escribe any instructions given to the field observers to ensure the entire area was ed, then go to Question 10.
9.	If a full	canvassing was not conducted:
	a.	How many predetermined outlets were to be observed in each area?
	b.	What were the starting points for each area?
	C	Were these starting points randomly chosen?

	∐ Yes ∐ No
d.	Describe the selection of the starting points.
e.	Please describe the canvassing instructions given to the field observers, including predetermined routes.
0. Describ	e the process field observers used to determine if an outlet sold tobacco.
_	provide the state's definition of "matches" or "mismatches" to the Synar sampling (i.e., address, business name, business license number, etc.)
